

Emergency Notification System

Athens State utilizes SchoolCast as its emergency notification system. This is the system that Athens State will use to notify you of:

- Emergency conditions on campus
- Closings and delayed openings due to weather or other events
- and, other situations requiring rapid notification

An account has already been created for you and populated with your Athens State email address. You will receive an email message from us with the following information:

- Your user name
- Temporary password

If you do not know your user name or password, email telephone@athens.edu for assistance.

You will need this information to login to your account and register cell, home, and work numbers or another email account for emergency notification. To register the numbers and another email account, go to the Athens State Alert web site hosted at:

<https://www.schoolcast.com/go/asu>

If you would like to view a video demonstration (no audio) of the registration process:
